

In the Claims:

Please delete the word "Claims" and insert –What is claimed is:– therefor.

Please amend the claims as follows:

1. *(original)* A mobile telephone comprising:
 an engine assembly comprising a display and a plurality of switches; and
 a flexible cover overlying, without an intermediate rigid cover, and snugly fitting the engine assembly and comprising an integrated keypad, for user input, aligned with the plurality of switches, wherein the flexible cover comprises a flexible substrate and at least one leather or fabric portion attached to the substrate.
2. *(currently amended)* A mobile ~~phone~~ telephone as claimed in claim 1, wherein the flexible cover is made from flexible material which defines a cavity for receiving the engine assembly and has an insertion aperture through the material to the cavity through which the engine assembly can fit.
3. *(currently amended)* A mobile ~~phone~~ telephone as claimed in claim 2, further comprising means for closing or restricting the insertion aperture after the engine assembly has been inserted.
4. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding claim~~ claim 1, wherein the flexible cover comprises an aperture aligned with the display.
5. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding claim~~ 1, comprising a plurality of fabric or leather portions attached to the substrate and/or each other.

6. *(currently amended)* A mobile ~~phone~~ telephone as claimed in claim 5, wherein portions of the plurality of leather or fabric portions overlap.
7. *(currently amended)* A mobile ~~phone~~ telephone as claimed in claim 6, wherein portions of the underlying substrate are exposed.
8. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the integrated keypad has a plurality of key portions on an exterior surface of the flexible cover and a plurality of corresponding projections on the interior surface of the flexible cover, each of said projections being arranged to actuate one of the plurality of switches of the engine assembly.
9. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the flexible cover and the engine assembly have corresponding projections and receptacles for aligning the flexible cover correctly with the engine assembly.
10. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the flexible cover is made from fabric, elastically deformable material, or leather.
11. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the flexible cover is substantially formed from one-piece of material.
12. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the flexible cover is substantially made in accordance with the techniques used in the fabrication of sports shoes.

13. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the flexible cover has an elastic and waterproof substrate adjacent the engine assembly.
14. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the flexible cover has a moulded elastomer substrate adjacent the engine assembly.
15. *(currently amended)* A mobile ~~phone~~ telephone as claimed in ~~any preceding~~ claim 1, wherein the flexible cover is user replaceable.
16. *(currently amended)* A user replaceable flexible cover for a mobile phone ~~as claimed in any preceding claim~~ having an engine assembly comprising a display and a plurality of switches, wherein the user replaceable flexible cover comprises: a flexible cover overlying, without an intermediate rigid cover, and snugly fitting the engine assembly; an integrated keypad, for user input, aligned with the plurality of switches; and a flexible substrate and at least one leather or fabric portion attached to the substrate.
17. *(cancelled)*
18. *(cancelled)*
19. *(cancelled)*
20. *(original)* A mobile telephone comprising:
an engine assembly comprising a display and a plurality of switches and a leather/fabric cover overlying, without an intermediate rigid cover, and snugly fitting the engine assembly and

comprising an integrated keypad, for user input, aligned with the plurality of switches, wherein the flexible cover comprises a flexible substrate and at least one leather or fabric portion attached to the substrate.
